

Tribhuja — Site Flow

Scroll-based single page. Written in the catalogue's voice — each section carries a line from the book, followed by the one fact it grounds.

01 · Hero — Video

After the light. After the air. After the quiet. Nine towers, where all three meet. Cinematic video opens on the project; overlay carries the opening verse and the location mark — Kollur · Hyderabad · ORR Exit 2.

02 · Location — Kollur

Not the edge of Hyderabad. Its next centre. The site on a map. 500 ft of frontage on the ORR. 30 minutes to the airport. 24 to the Financial District. 23 km of greenbelt between the ring road and the runway.

03 · The Master Plan

9.16 acres. Seventy-six percent open. An aerial of the site as it will be lived in — nine towers at 120 metres, the clubhouse at the heart, the grounds around it.

04 · The Clubhouse — 100,000 sq ft

Every hour of Tribhuja's life passes through here. The largest clubhouse in Kollur. A bride getting ready. A grandfather reading. A ten-year-old's first swim. Sixteen rooms for sixteen kinds of afternoon.

05 · The Grounds

In the water, the towers disappear. Ten acres of open ground, organized in six movements — Link Parks, Leaside, Terra, Aqua, Tranquil, Beyond. The amphitheatre, the pools, the herb garden, the reflexology walk.

06 · The Homes — Unit Configurations

A plan drawn around a family, not a floor plate. Four configurations. A three-bedroom for a young family. A three with study for the family that works from home. A four-bedroom for the whole house at once. And one more, at the corner, drawn without compromise.

07 · Home Interiors

A room that fills with the first light of the day. Living rooms open to the light. Kitchens at the heart. Bedrooms with their own wall to the sky. Ten and a half feet above every floor.

08 · Specifications

Built on what holds. RCC shear-wall frame. UPVC windows, tinted toughened glass. Granite, vitrified tile, teak veneer. Four high-speed lifts. Hundred percent power backup. The full sheet, on request.

09 · The Team Behind It

The hands behind the form. LAVA as principal architect. SEP on design. Strudcom, structural. LEAD, MEP. Knight Frank as PMC. JLL on cost. SK-A on landscape. L'Avenir for the lifts.

10 · Enquiry

Some homes are chosen. Others are kept for. Private walkthroughs by appointment. One number. One button. No form on the page.

Voice & essence — non-negotiable for build

- **No feature lists.** Catalogue names one moment per amenity, not amenities themselves. e.g. *'The evening begins when you do.'* (Banquet Hall) — not *'State-of-the-art banquet hall.'*
- **No exclamation marks.** No 'luxury,' 'premium,' 'world-class,' 'state-of-the-art.' Catalogue earns its register by restraint; one wrong word collapses the tone.
- **Numbers paired with meaning.** Not *'120m tall.'* Instead *'Eight hundred feet of vertical life.'* Same fact, human register.
- **Cormorant Garamond italic** for all emotional copy (verses, pull-quotes, section openers). Sans-serif only for meta-data, labels, CTAs.
- **Palette.** Charcoal black background · copper (not gold) accent · cream (not pure white) for body. Matches the catalogue cover exactly.
- **Whitespace.** Catalogue has pages with three lines of text. Scroll-stops on the site should feel the same — earn the weight of the next line.
- **Copy pattern.** Each section opens with a short poetic observation, then grounds with one fact. Example: *'In the water, the towers disappear.'* → *'Ten acres. Seventy-six percent open.'*
