

Tribhuja — Site Flow

Scroll-based single page. Written in the catalogue's voice — each section carries a line from the book, followed by the one fact it grounds. **v2 · incorporates client review notes of 22 April 2026.**

01 · Hero — Video

Where the light. Where the air. Where the quiet. Nine towers, where all three meet. Cinematic video opens on the project; overlay carries the opening verse and the location mark — Kollur · Hyderabad · ORR Exit 2. **Asset source TBD: new renders vs. existing AV — to be confirmed with Zuari before build.**

02 · Location — Kollur

Not the edge of Hyderabad. Its next centre. The site on a map. 500 ft of frontage on the ORR. 30 minutes to the airport. 24 to the Financial District. 23 km of greenbelt between the ring road and the runway.

03 · The Master Plan

9.16 acres. Seventy-six percent open. An aerial of the site as it will be lived in — nine towers at 120 metres, the clubhouse at the heart, the grounds around it.

04 · The Clubhouse — 100,000 sq ft

Every hour of Tribhuja's life passes through here. The largest clubhouse in Kollur. A bride getting ready. A grandfather reading. A ten-year-old's first swim. Sixteen rooms for sixteen kinds of afternoon.

05 · The Grounds

In the water, the towers disappear. Ten acres of open ground, organized in six movements, each labelled in plain language alongside its name: **Link Parks** (arrival plazas & pathways) · **Leeside** (temple, market, kids' play) · **Terra** (sports courts & toddler zones) · **Aqua** (five pools, wet & dry lounges) · **Tranquil** (gardens, outdoor gym, picnic) · **Beyond** (pet park, tree house, super-bloom walk).

06 · The Homes — Unit Configurations

A plan drawn around a family, not a floor plate. Four configurations. A three-bedroom for a young family. A three with study for the family that works from home. A four-bedroom for the whole house at once. And one more, at the corner, drawn without compromise.

07 · Home Interiors

A room that fills with the first light of the day. Living rooms open to the light. Kitchens at the heart. Bedrooms with their own wall to the sky. Ten and a half feet above every floor.

08 · Specifications

Built on what holds. RCC shear-wall frame. UPVC windows, tinted toughened glass. Granite, vitrified tile, teak veneer. Four high-speed lifts. Hundred percent power backup. The full sheet, on request.

09 · The Team Behind It

The hands behind the form. LAVA as principal architect. SEP on design. Strudcom, structural. LEAD, MEP. Knight Frank as PMC. JLL on cost. SK-A on landscape. L'Avenir for the lifts.

10 · Enquiry

Some homes are chosen. Others are kept for. Private walkthroughs by appointment. One CTA on the page — Request a Visit. Enquiry handling, CRM, and post-click journey managed by Zuari.

Voice & essence — non-negotiable for build

- **No feature lists.** Name one moment per amenity, not the amenity. *'The evening begins when you do.'* — not *'State-of-the-art banquet hall.'*
- **No exclamation marks.** No 'luxury,' 'premium,' 'world-class,' 'state-of-the-art.' The register is earned by restraint.
- **Numbers paired with meaning.** Not *'120m tall.'* Instead *'Eight hundred feet of vertical life.'*
- **Cormorant Garamond italic** for emotional copy. Sans-serif only for meta-data, labels, CTAs.
- **Palette.** Charcoal black · copper (not gold) · cream (not pure white). Matches the catalogue cover.
- **Whitespace.** Earn the weight of the next line — three lines per scroll-stop is often enough.
- **Copy pattern.** Short poetic line, then one grounding fact. *'In the water, the towers disappear.'* → *'Ten acres. Seventy-six percent open.'*

Build considerations — to lock before development

- **Mobile.** 70–75% of traffic will be mobile. Every section needs a mobile adaptation brief at 375px width — typography scale, tile grid collapse, hero video fallback poster, tap targets. Addendum to follow.
- **Performance.** Hero video plus ten render-heavy sections will be heavy. Lazy-load all below-the-fold imagery. WebP with JPG fallback. Video under 4MB, H.264 + AV1 progressive. Target Lighthouse mobile > 80.
- **SEO layer.** The sparse on-page copy is intentional. Metadata, page titles, H1 hierarchy, alt text, and schema.org markup to be built in parallel — aligned with the 8 priority keywords supplied by Zuari.
- **Content governance.** Post-launch voice ownership needs a documented protocol: who may edit copy, who approves, and a named voice-guardian on StreeVia side to prevent drift.
- **Asset approvals.** All produced visuals (master plan render, hero video, interior renders, landscape illustrations) locked for direction & mood with Zuari *before* final production spend.
